

BROUGHT TO YOU FROM THE MANUFACTURERS OF SPEED ROLLER

NEW FOR 2010

SPEED SPRAYER

AIRBOOM TURF SPRAYER

LOW VOLUME POSITIVE CHARGE FOR TURF

- **Generates 70 MPH wind speed for increased turf coverage**
- **Positive ion charge adheres solution to negative ground cover**
- **Spray in windy conditions with reduced drift**
- **Low volume of spray/ 20-50 gallons per acre**

*Advanced Technology
for the
Challenges of Tomorrow*

SPEED SPRAYER

AIRBOOM TURF SPRAYER

COST SAVINGS

- Lower average gallons per acre of spray material
- Less water per acre/Reduced refills
- Reduction in fuel per acre
- More concentrated spray
- Use lowest recommended rates for material

HOW IT WORKS

- Spray particle is positively charged using a copper ionization system
- Spray material travels through separate tubing, injected into nozzle tips, and sheared to 50 microns
- Air is the carrier allowing for a more concentrated solution and better penetration
- Air pressure and smaller droplets allow for better penetration and uniform coverage

GOLF TURF MODEL

**SKID MOUNT UNIT CAN BE ADAPTED
FOR ALL UTILITY
VEHICLES WITH 18 FT BOOMS**
